

MOEZ ROJBI

Senior Manager & Technical Lead | .NET & SQL | Agile & DevOps | PSM® Certified
+216 20 605 420 moez.rojbi@gmail.com linkedin.com/in/moez-rojbi

PROFESSIONAL SUMMARY

Results-driven Senior Manager and Technical Lead with 13+ years of expertise in .NET, SQL, and full-stack development within the financial services sector. Proven track record of leading cross-functional, geographically distributed teams and driving Agile transformations at scale. Skilled in architecting microservices solutions, modernizing legacy systems, and integrating cloud-native technologies (OpenShift, Azure, Kafka). Passionate about leveraging AI-powered tools to accelerate development velocity and improve code quality. Core competencies include system migration, DevOps automation, regulatory compliance (FATCA/CRS, CSDR), and delivering high-impact financial platforms.

CORE COMPETENCIES

Microservices Architecture • Legacy System Modernization • Cloud Platforms (OpenShift, Azure) • Event-Driven Architecture (Kafka)
• Agile / Scrum • DevOps & CI/CD • .NET / C# / SQL Server • Angular • Team Leadership & Mentoring • AI-Assisted Development •
Regulatory Compliance • Performance Optimization • Stakeholder Management

PROFESSIONAL EXPERIENCE

Senior Manager | Technical Lead

ODDO BHF — Tunis, Tunisia | 03/2022 – Present

- Spearheaded the decoupling of the legacy LCB (Lutèce Core Banking) system, reducing inter-module dependencies by designing bounded contexts and isolating critical business domains for independent deployment.
- Initiated and drove the migration toward a microservices architecture using **Angular** for the front-end layer, breaking monolithic modules into independently deployable services—successfully migrating e-Invoice, FIP, CLICSTP, and JDD modules, resulting in improved scalability, faster release cycles, and reduced production incidents.
- Engineered event-driven integrations using Apache Kafka for real-time data streaming between decoupled services, improving data consistency and throughput.
- Deployed and managed containerized services on Red Hat OpenShift, enabling auto-scaling, zero-downtime deployments, and infrastructure-as-code practices.
- Introduced AI-powered development tools (GitHub Copilot, AI-assisted code review) across the team, increasing developer productivity by ~20% and improving code quality through automated suggestions and test generation.
- Led the Agile transformation across distributed teams (Tunisia, France, Germany), implementing Scrum ceremonies and improving sprint velocity by 30%.
- Migrated CI/CD pipelines to Azure DevOps, automating build, test, and deployment workflows and reducing release cycle time by 40%.
- Strengthened Quality Assurance practices by establishing automated regression testing frameworks, leading to a 50% reduction in production defects.
- Delivered high-impact financial projects:
 - Caseis – Enhanced financial system with improved functionality and performance.
 - Clearing Module – Developed and integrated a clearing module enabling ODDO BHF to operate as a clearing bank.
 - LBPSG Migration – Managed end-to-end system migration with zero business disruption.
 - FATCA/CRS Compliance – Implemented global tax regulation adherence across all relevant modules.

Team Lead | .NET Developer

ODDO BHF — Tunis, Tunisia | 04/2019 – 03/2022

- Managed a team of 8 developers building and optimizing core banking modules (Financials, Private Equity, Settlement) within the LCB platform.
- Drove the design and delivery of financial system solutions aligned with business and regulatory requirements, including CSDR compliance for the settlement module.
- Improved system performance and scalability through architectural reviews, query optimization, and caching strategies.
- Mentored junior developers through code reviews, pair programming, and knowledge-sharing sessions, accelerating onboarding time by 25%.
- Collaborated with cross-functional stakeholders in France and Germany to translate business requirements into technical solutions.
- Led the successful migration of financial systems to a new platform, improving reliability and reducing operational overhead.

.NET Developer

ODDO BHF (via Tessan Group) — Tunis, Tunisia | 01/2017 – 04/2019

- Contributed to the development of the LCB (Lutèce Core Banking) platform, building and maintaining modules for a large-scale financial system.
- Collaborated within a 20+ member Agile team, participating in sprint planning, daily stand-ups, and retrospectives.
- Developed RESTful APIs and back-end services using .NET, C#, and SQL Server.
- Ensured code quality through unit testing, code reviews, and adherence to SOLID principles.

Full-Stack Developer

Astrepo — Sydney, Australia | 07/2016 – 07/2017

- Built and maintained web applications using PHP (Symfony 2), Elasticsearch, and MySQL.
- Managed cloud infrastructure on AWS (EC2, Nginx, PHP-FPM) with automated deployments.
- Implemented automated testing (PHPUnit, MonkeyJS) ensuring high code coverage.
- Followed Agile/Scrum methodology with Basecamp for project management.

Full-Stack Developer

Vievim LLC — USA (Remote) | 07/2014 – 12/2016

- Designed and developed VieVim, a cloud-based office management system using .NET, JavaScript, and Azure.
- Built RESTful web services and APIs with Entity Framework and MS SQL Server.
- Deployed and managed applications on Azure cloud and Windows Server infrastructure.

Full-Stack Developer

Working Software — Sydney, Australia (Remote) | 03/2015 – 03/2016

- Developed cross-platform web and mobile applications using PHP, JavaScript, and Cordova/PhoneGap.
- Managed databases (MySQL, MS SQL, IndexedDB) and AWS cloud infrastructure.
- Implemented automated testing with PHPUnit and MonkeyJS in an Agile environment.

Software Engineer

MAySoft — Djerba, Tunisia | 11/2013 – 03/2015

- Developed software solutions as part of an engineering team, contributing to full software development lifecycle from requirements analysis to deployment.

TECHNICAL SKILLS

Languages & Frameworks: .NET, C#, ASP.NET, Entity Framework, Angular, PHP (Symfony), JavaScript, HTML5, CSS3

Databases: SQL Server, MySQL, Elasticsearch, IndexedDB

Cloud & DevOps: Azure DevOps, OpenShift (Kubernetes), AWS, Docker, CI/CD Pipelines

Messaging & Integration: Apache Kafka, RESTful APIs, Web Services, Event-Driven Architecture

AI & Tooling: GitHub Copilot, AI-Assisted Code Review, Automated Test Generation

Methodologies: Agile, Scrum, DevOps, TDD, Code Review

Tools: Git, Azure DevOps, JIRA, Basecamp, Visual Studio

EDUCATION

Computer Engineering Degree

École Nationale des Sciences de l'Informatique (ENSI) — Tunisia | 2010 – 2013

CERTIFICATIONS

- Professional Scrum Master™ (PSM®) – Scrum.org

LANGUAGES

Arabic: Native • French: Fluent • English: Professional Proficiency
